

The New DSD4921RV VAST™ Certified Set Top Box

DSD4921RV - A New Star is Born.

The UEC DSD 4921 RV is a "Next Generation" VAST™ Certified, Twin Tuner, High Definition, Digital Satellite Set Top Box. This product is packed with new technology, features and accessories, making it ideal for both the traveller and standard in home installation.

The twin tuner configuration, plus suitable recording device, (not included) allows support for PVR functionality.

UEC's market leading hardware and software ensure the receiver is 'future proof' through using latest technology and over the air software upgrade. The hardware is designed to withstand the harsh Australian environment that recreational vehicles are likely to experience including high temperatures, DC over voltage, reverse polarity and short circuit protection.

All of these class leading features are housed in the smallest VAST™ receiver on the market, making it the perfect solution for Caravan and RV enthusiasts wanting to watch and record their favorite programs whilst traveling.

Each DSD 4921 RV product is supplied with: 240V AC wall mount power supply, 12V DC power cord & Aux connector for easy RV installation, HDMI plus 3x RCA Audio/Video cables, high quality remote control and tv EYE™ extender for installation into units or cabinets.

The DSD 4921 RV is Hybrid Broadband TV (HbbTV) ready with all key software features to support Freeview Plus once available on the VAST™ platform.
