

How to load channels into the DSR1000HD Satellite receiver

Go to MENU > Tools > Software upgrade and press OK

Go down to Section, arrow right till you see User

Insert your USB containing the “dump_all.bin” file.

Go down to File Path, Press OK, You will see the USB socket the USB stick is plugged into either C: or D:, Press OK

Go down to Start and press OK. The receiver will load file.

Wait for the receiver to restart then you can use it.
